

MP-111: Endovenous Ablation of Varicose Veins

Bellcourt Medical Policy | Version 1 | Status: ACTIVE | Effective for dates of service 2024-01-01 until superseded

Field	Value
Policy number	MP-111
Service code(s)	BHA-VASC-3647
Applies to	All clients administered by Bellcourt unless the client's plan document or delegation addendum states otherwise
Owner	Clinical Policy Committee
Version	v1

1. Purpose and scope

This policy sets out the clinical criteria Bellcourt reviewers use to decide whether the service described in this policy (Endovenous Ablation of Varicose Veins) is medically necessary. It is applied to prior authorization requests where the date of service falls within the effective period stated above. A client's plan document may exclude this service or impose additional requirements; plan provisions are checked first.

2. Definitions

Medically necessary: services that are appropriate and consistent with the diagnosis, in accordance with generally accepted standards of medical practice, and not primarily for the convenience of the member or provider.

3. Coverage criteria

The service is considered medically necessary when the criteria below are met, read together using the AND / OR connectors shown:

- 1 Symptomatic varicose veins (pain, swelling, heaviness, skin changes); AND
- 2 Duplex ultrasound showing reflux of at least 500 milliseconds in the treated vein; AND
- 3 Failure of at least 3 months of compression therapy.

4. Not medically necessary / limitations

- Treatment of spider veins or for cosmetic purposes.
- Reflux under 500 ms.

5. Documentation requirements

Symptom history, duplex ultrasound report with reflux times, compression therapy record.

If required documentation is missing, the request must be pended and the provider contacted for information. It must not be denied for lack of documentation until the information request has gone unanswered within the

regulatory timeframe.

6. Version history

Version	Effective	Summary
