Version	v1

1. Purpose and scope

This policy sets out the clinical criteria Bellcourt reviewers use to decide whether the service described in this policy (Outpatient Physical Therapy Beyond the Initial 12 Visits) is medically necessary. It is applied to prior authorization requests where the date of service falls within the effective period stated above. A client's plan document may exclude this service or impose additional requirements; plan provisions are checked first.

2. Definitions

Medically necessary: services that are appropriate and consistent with the diagnosis, in accordance with generally accepted standards of medical practice, and not primarily for the convenience of the member or provider.

3. Coverage criteria

The service is considered medically necessary when the criteria below are met, read together using the AND / OR connectors shown:

- 1 A current progress note (dated within the last 10 visits); AND
- 2 Documented measurable functional progress toward stated goals, with goals not yet met.

4. Not medically necessary / limitations

- Maintenance therapy where no further functional progress is expected.

Note: Visit counts are also subject to the plan's annual benefit limit, which is set out in each plan document.

5. Documentation requirements

Initial evaluation, most recent progress note with objective measures, visit count.

If required documentation is missing, the request must be pended and the provider contacted for information. It must not be denied for lack of documentation until the information request has gone unanswered within the

regulatory timeframe.
