

## UM Operations Memo 2025-19

From: Director, UM Operations | To: All nurse reviewers | Date: December 18, 2025 | Re: Lumbar MRI requests

Team, the PACE criteria screen for lumbar spine MRI will not be updated before year-end because of the system change freeze. To keep decisions consistent with what PACE shows, **please continue to apply the 6-week conservative therapy requirement for lumbar MRI requests** until further notice. Systems expects to update the screen in Q1.

Thanks for your continued hard work during the busy season. - D. Mercer
